

Restricted Stations and Feeders for Distributed Generation Connections

Effective January 2, 2026, the following Enova stations and feeders are restricted from any new DER connection. This restriction applies to all generation projects, including those rated below 12 kW, regardless of inverter or non-inverter or whether the project is exporting or non-exporting (net metered or load displacement).

List of restricted feeders and stations:

Kitchener 1TS:

1M1
